For the 2nd time, the Thoracic Surgery department of the Sun Yat-sen University cancer center is hosting the Sino-French Symposium in Thoracic Oncology, with its French partners, namely Gustave Roussy, Grand Paris, the Centre Chirurgical Marie Lannelongue (CCML) and the Centre Jean Perrin (CJP).

We have the honor to announce that the Sino-French 2014 Symposium in Thoracic Oncology has been selected as one of the projects being part of the 50th Anniversary of the Sino-French collaboration as an example of the cutting-edge technology and research cooperation between our two countries.

The Sun-Yat sen University cancer center, top 1 cancer center in China, is the largest specialized cancer center integrated with cancer treatment, medical training, medical research, and cancer prevention in southern China.

Gustave-Roussy is one of the world’s leading cancer-research institutes and the biggest health center dedicated to oncology in Europe. Internationally renowned for its cutting-edge technology and its innovative therapy, Gustave Roussy is at the forefront in very promising areas such as personalized medicine and tomorrow’s therapies (immunotherapy, DNA repair inhibitors, and epigenetic modulators).

The Centre Chirurgical Marie Lannelongue is a non-profit organization specialized in Thoracic surgery and interventions (heart, lungs, major vessels, etc.) as well as a university teaching hospital ensuring cutting edge medical practices. Historically preeminent nationally and internationally in the treatment of adult and infant thoracic and cardiovascular pathologies, the CCML has always been at the edge of medical practice (First heart-lung transplant: June 1986, First double-lung transplant: 1988, First pulmonary endarterectomy: 1995, First total tracheal replacement using a vascularised, autologous fascio-cutaneous free-flap: 2007 (in collaboration with Dr. F. Kolb from Gustave Roussy)).

The Centre Jean Perrin was created in 1973 and is one of the 20 anticancer centers open in France. The center offers multidisciplinary treatments such as imaging, biology and pathology, surgery, radiation therapy, medical treatment, supportive care, palliative care and works together with the University Hospital on education and research matters.

The conference will gather internationally top-renowned specialists both from China and France and will focus on multidisciplinary topics of Thoracic Oncology: Early Stage of NSCLC and Minimally Invasive Surgery, Surgical Treatment on Trachea and Mediastina Tumor, Multi-Disciplinary Treatment in Lung Cancer, Oral Chemotherapy, New Drug Therapy for NSCLC, Innovation in Thoracic Surgical Techniques, Surgical Treatment for Postoperative Complication, Progress in Radiation Therapy for Thoracic Cancer, etc.
