

Preparations for MR test

1. The examination time and place is indicated on the appointment form. You need to pay at least one day before the scan by 18.00pm. Please go to the MR Service desk at the time of the appointment and wait for the examination. If the examination needs to be rescheduled, please call the service desk: 020-87343214 or 020-87342100.
2. If you are also requested to take the nuclear medical examination, e.g. bone scan, PET-CT, please inform your doctor and schedule the MR examination before the nuclear medical examinations or 24 hours after the nuclear medical examination. If you are requested to take the gastrointestinal barium meal examination, please inform your doctor and schedule the MR examination before the gastrointestinal barium meal examination.
3. Patients should not take the MR examination if you have any of the following: viscera stents or apparatus, such as pacemakers, defibrillators, intra-aortic balloon pump (IABP), electrical cochlea, Swan-Ganz catheter, magnetic intraocular implants, aorta clamp, anastomosis clamp, remaining tracheal intubation; or heart valve replacements.
4. Patients who have had weak magnetic implant surgery should not take the MR examination within 6-8 weeks after the surgery.

5. If the patient has any metal inside his/her body, please kindly inform the doctors and clarify the properties of the metal. The doctor will decide whether the metal should be removed or not.
6. Patients with a high fever or who are pregnant should not take the MR examination.
7. The patient cannot wear any metal accessories or clothes with metal objects (e.g. metal zipper, metal button), or wear any metal objects (e.g. dentures, wig, keys, coins, electronic card, lighters, belts, bra, etc.) when taking the MR examination.
8. Patients who have biliary lesions need to fast before the examination.
9. Please be advised the duration time of the examination varies for each patient. Please cooperate with the doctors at all times in order to ensure the safety of staff and patients.
