

# CT test and water drinking

1. If you are scheduled for a head, chest or limb(s) CT test, there are no specific water drinking regulations that apply.
2. If you are scheduled for a pelvic CT test, please drink 1.5 liters water after your contrast medium injection. Please refrain from urinating until after the CT test.
3. If you are scheduled for an abdomen CT test, please drink 0.5 liters water after the contrast medium injection .You do not need to refrain from urinating.
4. In order to get rid of the contrast medium, please drink as much water as possible within 1-2 days after the CT test, unless told otherwise by the doctor.
